-2-

25X1

- 11 open pit mines
- 6 shaft mines
- 10 briquet factories
- 4 power plants
- 2 low-temperature carbonizing installations
- 1 wet pressing installation (Nasspresse)
- 5 workshops
- S training torkshops

The following installations were under the jurisdiction of Revierleitung Ferseburg:

- 10 open pit mines
- 2 shaft mines
- 13 briquet fretories
- 1? pover plants
- 2 montan wax factories
- 1 fire-gas drying installation
- 1 wet pressing installation
- 1 saumill
- 6 workshops
- 4 training workshops
- 2 training combines
- 1 central workshop.
- 4. On 1 May 1953 Bitterreld and Merseburg were combined to form one Revierleitung with the same number of accounting Kreise and installations but with only 138 administrative employees. The new Revierleitung was called Revierleitung Halle. On 1 May 1953 the former D plant Bohrbetrieb Mohenthurm was taken over by Revierleitung Halle.
- 5. As of 1 July 1952, Revierleitung Borna had 14 accounting Kreise, 87 installation, and 185 administrative personnel. The installations were as follows:
  - 14 open pit mines
  - 6 shaft mines
  - 24 briquet factories
  - 2 low-temperature corbonizing installations
  - 18 power plants
  - ll large workshops
  - 8 training workshops
  - A subsidiary factories of the coal industry

On 1 May 1993 two **accounting** Kreise and twenty installations were added to the Revisited Long, while the number of administrative personnel was reduced from 185 to 138. On 1 January 1954 Dampiharmerwerk Grossenhain (formerly a D plant), Stehlwerk Tetterz upe and Stahl- und Hartgusswerk Boesdorf were incorporated into the Pevierleitung Borna.
